

## Put ALG's **GHG Reporting and Verification** Expertise to Work for Your Company

### **Qualified GHG Professionals**

Ashworth Leininger Group (ALG) is a leading provider of GHG reporting and verification services. ALG has prepared and verified hundreds of Federal and California GHG reports, giving us a deep practical understanding of the GHG rules and the challenges associated with regulatory compliance. Most recently, ALG participated in the first GHG verification certification process for Washington State Department of Ecology.

ALG's team includes accredited specialists in the Oil and Gas Systems, Transactions, and Process Emissions sectors and therefore is qualified to verify all types of CARB GHG emission reports, as well as most industry sector types defined by Washington State's GHG emission reporting program. ALG has verified GHG reports for various industries including electricity generation, electricity providing entities, oil and gas, petroleum refining, transportation fuel suppliers, and a variety of other industrial processes. In addition to GHG verification services, ALG also assists facilities in developing comprehensive GHG compliance and reporting programs to meet the requirements of EPA and state rules.

### **Broad Environmental Consulting Experience**

ALG consists of an interdisciplinary team of scientists and engineers with years of experience in providing a wide range of environmental consulting services, including air quality permitting, compliance plans, emission inventories, health risk assessments, and environmental auditing. ALG has the technical background to understand the intricacies of industry operations and the regulatory challenges they face, bringing real-world perspective to the reporting and verification process.

### **Our Approach**

GHG reporting and verifications can be frustrating and burdensome if not conducted in an efficient and conscientious manner. ALG strives to improve the reporting and verification experience through:

- Use of seasoned technical staff (not junior staff)
- Early recognition of key issues
- Thorough and comprehensive deliverables
- Effective use of client resources

ALG leverages our experience in GHG verifications, GHG reporting, and environmental consulting to streamline and clarify the reporting and verification process.

## About Ashworth Leininger Group

Ashworth Leininger Group (ALG) is an environmental management consulting firm located in the Los Angeles, California area, with satellite offices located in the San Francisco Bay Area and Colorado.

For more than twenty years, ALG has assisted clients in securing local, state, and federal air permits; addressing complex air quality compliance issues; conducting

environmental audits; preparing periodic air quality emissions and toxic release inventory reports; assessing facility impacts on local and regional air quality; and assisting with the design and implementation of stormwater, hazardous waste, and hazardous materials management programs.
